# Latin America and Global Capitalism

A Critical Globalization Perspective

**William I. Robinson**

This ambitious volume chronicles and analyzes from a critical globalization perspective the social, economic, and political changes sweeping across Latin America from the 1970s through the present day. Sociologist William I. Robinson summarizes his theory of globalization and discusses how Latin America's political economy has changed as the states integrate into the new global production and financial system, focusing specifically on the rise of nontraditional agricultural exports, the explosion of *maquiladoras*, transnational tourism, and the export of labor and the import of remittances. He follows with an overview of the clash among global capitalist forces, neoliberalism, and the new left in Latin America, looking closely at the challenges and dilemmas resistance movements face and their prospects for success.

"William I. Robinson has delivered us a powerful statement on contemporary Latin America as both a product of globalization and a challenge to the view that 'there is no alternative.'"

This is a wide ranging political economy which is both well researched and eminently readable. A must!"—Ronaldo Munck, author of *Contemporary Latin America*

Through three case studies—the struggles of the region's indigenous peoples, the immigrants rights movement in the United States, and the Bolivarian Revolution in Venezuela—Robinson documents and explains the causes of regional socio-political tensions, provides a theoretical framework for understanding the present turbulence, and suggests possible outcomes to the conflicts.

Based on years of fieldwork and empirical research, this study elucidates the tensions that globalization has created and shows why Latin America is a battleground for those seeking to shape the twenty-first century's world order.

**William I. Robinson** is a professor of sociology, global studies, and Latin American and Iberian studies at the University of California, Santa Barbara. He is the author of several books on globalization, including *A Theory of Global Capitalism*, also published by Johns Hopkins.
